- 4 Metres rack
- Instruction manual

*The colour, design and style of the BONUS remote controls and keypads are subject to change based on stock availability.

Contents of Kit:

What size & weight gate can the Automaxx500 handle?

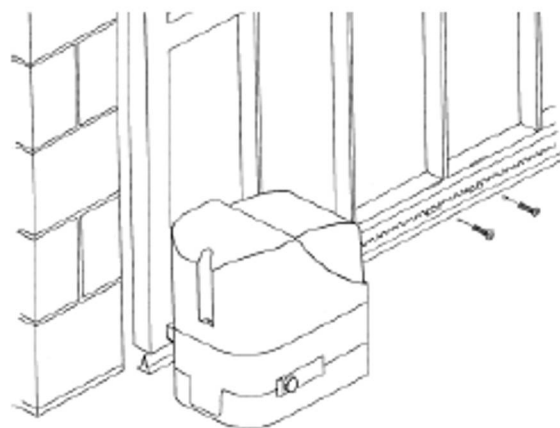

Up to 8m wide & up to 500kg!*

Your SUN-POWER Automaxx Series Auto Sliding Gate Operator has been designed and built to make installation simple and maintenance almost non-existent.

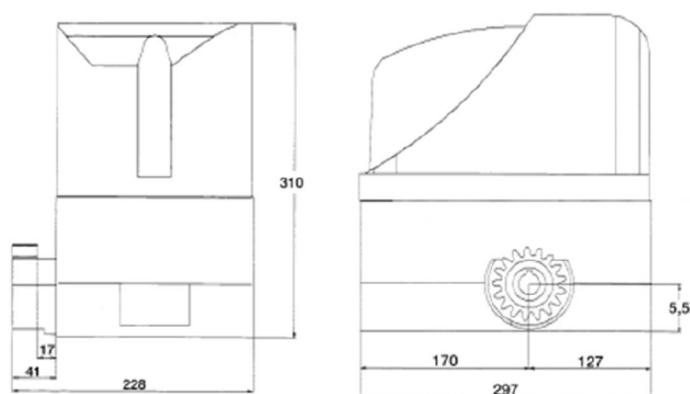

To save you time, and make installation easier, the circuit board is pre-wired & placed under the plastic weatherproof cover together with the Motor/Battery/Radio receiver etc. This means that you do not have to spend extra time wiring up to a separate control box. Likewise, the radio receiver is also connected and the 3 remote controls are pre-programmed.

Circuitry for most options are already included. You simply have to connect up the external devices, such as Solar Panel, Antenna, Push buttons etc. The design features in the SUN-POWER Automaxx Series Sliding Gate Operators will save you time on-site, and the installation will be neat & tidy.

Apart from its physical attributes, the control circuit has some powerful operating features. These can be adjusted on-site, without modification to suit a range of situations.

Operator Dimensions:

The SUN-POWER Automaxx Series Operators can be used in a variety of situations.

240V AC - SOLAR Power - 12V

The powerful control system gives the flexibility to change some important characteristics of the operation, i.e:

- Signal to Close (i.e. from transmitters, e.g. remote controls, digital keypads, push-buttons, photoelectric cells etc.)
- Automatic Close
- Sensitivity to obstacles (e.g. vehicles, children, animals etc.)

The control system also allows for the addition of the following transmitter options:

- Push Buttons
- Photoelectric cells
- Digital Keypads etc

*Up to 500kg on level ground, free-rolling (i.e. non-binding). For gates wider than 4m, extra rack is an optional extra.
